The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Terminal Disclaimer

1. The terminal disclaimer filed on December 20, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,780,160 B1 has been reviewed and is NOT accepted.

The disclaimer fee of \$65 in accordance with 37 CFR 1.20(d) has not been submitted, nor is there any authorization in the application file to charge a specified Deposit Account or credit card.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 21-28 and 34-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 2, 6-9 and 11 of U.S. Patent No. 6,780,160 B2 in view of Urata et al (EP 0 638 803 A1). Zhou et al ('160) discloses the use of a specimen collection apparatus but fail to disclose the open end of the vessel and the cover having cooperating screw threads; the sealed access port is releasably sealed by a plug; the plug is threaded to releasably engage the first

closed end having cooperating threads; and the plug comprises a machine graspable outer surface; the graspable outer surface comprises a faceted surface.

Urata et al discloses a feces pick-up container for transportation and further disclose the open end of the vessel and the cover having cooperating screw threads; the sealed access port is releasably sealed by a plug; the plug is threaded to releasably engage the first closed end having cooperating threads; the plug comprises a machine graspable outer surface; the graspable outer surface comprises a faceted surface. See Page 11, lines 38-46; and Figures 1 and 2.

Since both Zhou et al and Urata et al disclose means for collecting fecal samples, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the apparatus of Zhou et al to include the vessel and the cover having cooperating screw threads as well as a releasable plug, as per the teachings of Urata et al, since it is well known in the art to provide various means of sealing a sample container. It also would have been a matter of obvious design choice to a person of ordinary skill in the art to provide a vessel with a tapered outer surface, wherein the tapered outer surface is oriented to create a first axially medial surface portion having a narrower axial cross-section than a second axially medial surface portion, wherein the second axially medial surface portion is located closer to the first closed end than the first axially medial portion, and the tapered outer surface has a substantially frustoconical shape, because the Applicant has not disclosed that the shape of the vessel provides an advantage, is used for a particular purpose, or solves a stated problem.

One of ordinary skill in the art, furthermore, would have expected the Applicant's

Art Unit: 3736

invention to perform equally well with a cylindrical vessel as that of Urata et al because the cylindrical vessel is capable of containing a fecal sample in the same way as that of a vessel with a tapered outer surface.

Conclusion

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Szmal whose telephone number is (571) 272-4733. The examiner can normally be reached on Monday-Friday, with second Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
